INC-2026-0412: Impossible Travel Login

Sample incident ticket for playbook 01. All names, IPs, and details are fictional.

Ticket	INC-2026-0412	**Status**	Closed - true positive, account compromised
User	a.alharbi	**Severity**	High (no MFA, mailbox access)
Analyst	Majed (L1)	**Escalated to**	L2 / Incident Response

Summary

User a.alharbi logged in from Riyadh at 10:45 and from Brazil at 10:48. The distance makes this physically impossible. MFA was not enabled on the account. The Brazil login came from a hosting provider IP on a new device, and the user denied the second login. A malicious inbox forwarding rule was found after the Brazil login.

Timeline (UTC+3)

Time	Event
10:45	Successful login, Riyadh, IP 203.0.113.10, usual laptop
10:48	Successful login, Brazil, IP 198.51.100.24, new browser, no MFA
10:50	Impossible travel alert fired, ticket created
10:55	Analyst confirmed both logins in auth logs, checked IP type (hosting provider)
11:05	Phoned the user. User denied the Brazil login
11:10	Active sessions killed, password reset, MFA enforced, IP blocked on firewall
11:30	Reviewed account activity after 10:48: new inbox rule forwarding mail to an external address
11:40	Inbox rule removed, escalated to L2/IR to check other accounts from the same IP

Findings

- Both logins successful, same account, different IPs
- Brazil IP belongs to a hosting provider, flagged in threat intel
- No MFA on the account
- Suspicious inbox forwarding rule created after the Brazil login
- Same IP had 3 failed attempts on two other accounts

Actions taken

- Sessions revoked, password reset, MFA enabled
- IP blocked at the firewall
- Forwarding rule removed
- Other two accounts reset as a precaution

Evidence attached

- Both auth log entries (exported)
- IP lookup results
- Screenshot of the inbox rule
- Call note: time, who, what the user said

Root cause

Weak or reused password, no MFA.

Recommendations

- Enforce MFA for all users
- Alert on new inbox forwarding rules
- Review other accounts without MFA

Closure notes

User informed, accounts monitored for 7 days.
